Art Unit: 2186

DETAILED ACTION

1. Claims 1-20 are presented for examination.

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "circuit is controlled by a host device" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by DeKoning et al., 6,467,023, hereinafter DeKoning.

The applied reference has a common assignee with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome

Art Unit: 2186

either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

As per claims 1 and 14, DeKoning teaches the use of providing sequential initialization of redundancy data in a volume comprising the steps of:

Defining a boundary (e.g. abstract);

Determining a location of the data with respect to the boundary (e.g. abstract); and

Initializing a redundancy location of the volume and writing the data and a redundancy of the data to the volume (e.g. abstract).

As per claim 2, DeKoning teaches the use of writing the data to a first portion of the volume and writing a redundancy of the data to a second portion of the volume (e.g. col. 3, lines 50-65).

As per claim 3, DeKoning teaches the use of the first portion comprises a primary data portion and the second portion comprises a redundancy data portion (e.g. abstract and col. 3, lines 50-65).

As per claim 4, DeKoning teaches the use of if the location is before the boundary, writing the data (e.g. col. 3, lines 50-65).

Application/Control Number: 09/645,949 Page 4

Art Unit: 2186

As per claim 5, DeKoning teaches the use of if after the boundary, enforcing a sequential write or not enforcing a sequential write (e.g. col. 3, lines 50-65 and col. 8, line 64 to col. 9, line 17).

As per claims 6 and 16, DeKoning teaches the use if the location is at the boundary, moving the boundary and initializing the redundant location or a next redundant location (e.g. col. 3, line 50 to col. 4, line 16).

As per claim 7, DeKoning teaches the use of the boundary comprises an initialization boundary (e.g. col. 3, line 50 to col. 4, line 16).

As per claim 8, DeKoning teaches the use of configured to sequentially write redundant data to a redundancy portion of the volume (e.g. col. 3, lines 50-65 and col. 8, line 64 to col. 9, line 17).

As per claim 9, DeKoning teaches the use of indicating an end of a primary data portion (e.g. col. 3, line 50 to col. 4, line 16).

As per claim 10, DeKoning teaches the use of in response to a predetermined attribute (e.g. abstract).

Application/Control Number: 09/645,949

Art Unit: 2186

As per claim 11, DeKoning teaches the use of predetermined attribute is user defined (e.g. col. 6, lines 35-45).

As per claims 12 and 13, DeKoning shows the controller software medium and computer readable medium to perform the steps of claim 1 (e.g. abstract).

As per claim 15, DeKoning teaches the use of a circuit comprising a volume configured to provide initialization of redundancy data, wherein the circuit is configured to sequentially initialize a redundant location of the volume to store redundant data up to a boundary of the volume (e.g. abstract, figure 1, element 102 and col. 8, line 64 to col. 9, line 17).

As per claim 17, DeKoning teaches the use of the circuit is controlled by a host device (e.g. figure 1, element 130).

As per claim 18, DeKoning teaches the use of the circuit comprises a drive controller (e.g. figure 1, element 102).

As per claim 19, DeKoning teaches the use of the circuit configured to control one or more drives (e.g. figure 1, elements 102 and 108).

Application/Control Number: 09/645,949

Art Unit: 2186

As per claim 20, DeKoning teaches the use of the circuit is configured to control one or more volumes of the one of more drives (e.g. abstract and figure 1, elements 102 and 108).

- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- a) Surugucchi et al. (6098119) is cited to show configuration disk drives at system initialization;
- b) Humlicek et al. (5822782) is cited to show configuration of RAID upon subsystem reset;
- c) DeKoning et al. (6334195) is cited to show configuration subsystem with desired user logical units; and
 - d) Franklin et al. (6510491) is cited to show configuration of RAID.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Denise Tran whose telephone number is (703) 305-9823. The examiner can normally be reached on Monday, Thursday and an alternated Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matt Kim can be reached on (703) 305-3821. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9306 for central Official communications.
